

One Support:

Cost-effective, Scalable IT Management

Did you know that the average salary for a lead IT specialist in Canada is **over \$100,000 a year**¹?

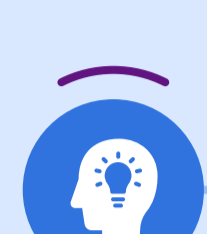

That's just one person with one person's worth of knowledge and expertise for about 40 hours a week (not counting holidays and vacations). Can your small or mid-size business carry that burden?

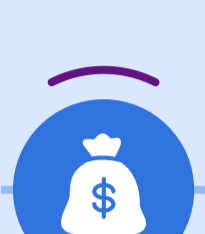

One team to do IT all

When you partner with a managed services provider, you gain access to an entire team of IT experts and resources without the burden of hiring and maintaining an in-house IT department.

Does this sound like your business?

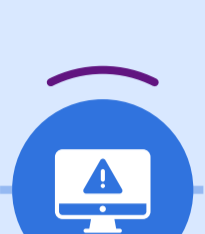

Limited in-house IT expertise

Cost-cutting budget constraints

Rapidly evolving technology landscape

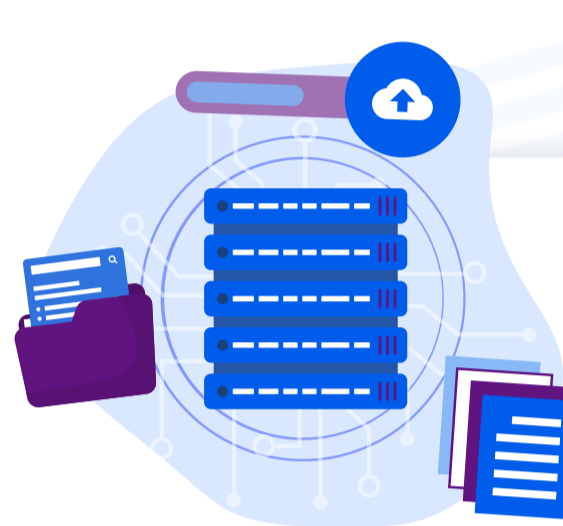

Security risks and compliance struggles

Lack of flexibility to scale on your terms

Enhance your support capabilities without increasing your headcount

Ignite Technology purpose-built One Support Managed IT Services provide you with an entire team of IT specialists with decades of combined expertise, all at a fraction of the cost of just one technology specialist.

Backup Management & Data Restoration

Get unlimited backup to quickly restore data if an incident occurs.

Email Filtering

Protect your users from the influx of unsolicited email messages they receive every day.

Internet Filtering

Give your team a layer of protection to help make browsing legitimate content easy.

User Awareness Training System

Turn your team into human firewalls to prevent cyber incidents at the start.

Remote Monitoring & Management

Get unlimited support and upgrades, without impacting productivity.

Endpoint Protection

Empower efficient detection and response to increase cyber resilience.

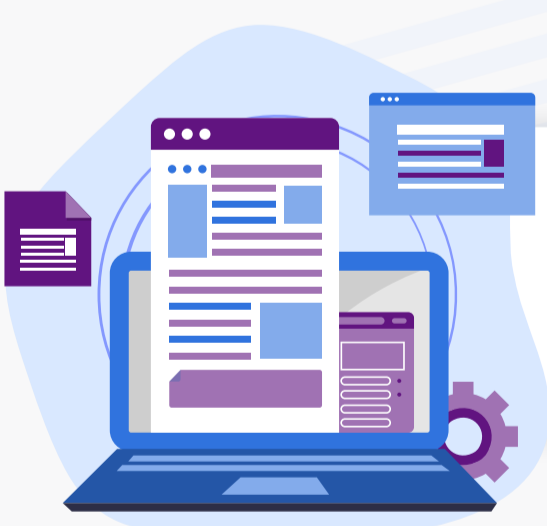

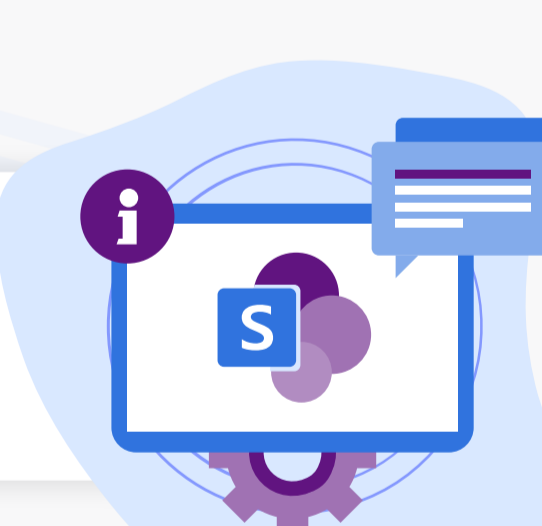

Data Loss Prevention

Gain confidence and keep sensitive data protected with simple deny/approve controls.

SharePoint Online Support

Increase the return on your SharePoint subscription by optimizing its use.

Domain Name System (DNS) Management

Mitigate system pathway disruptions to maintain operations.

Email Journaling

Respond quickly to litigation with storage of evidence and support.

With Ignite Technology Managed IT and Security Services, you can:

Alleviate IT burdens so you can focus on your business

Strengthen your overall security posture

Reduce costs while also enhancing productivity

Stay agile in an ever-changing technological landscape
